

CONTENTS

ff. § i. IDENTITY OF ELECTRICITIES FROM DIFFERENT SOURCES .	PAGE I
i. Voltaic Electricity	3
.....	7
ii. Ordinary Electricity	
iii. Magneto-Electricity	
iv. Thermo-Electricity	
.	
v. Animal Electricity	
§ 2. RELATION OF COMMON VOLTAIC ELECTRICITY BY MEASURE AND	• li • 17 t
II. § 3. NEW LAW OF ELECTRIC CONDUCTION	4« 54
§ 4. ON CONDUCTING POWER GENERALLY	53
III. § 5. ELECTRO-CHEMICAL DECOMPOSITION	
.	
i. New Conditions of Electro-chemical Decomposition	
Tf ii. Influence of Water in such Decomposition	ii
*ff iii. Theory of Electro-chemical Decomposition	i
IV. § 6. POWER OF PLATINA, ETC., TO INDUCE COMBINATION	
V. § 5. ELECTRO-CHEMICAL DECOMPOSITION—Continued (NOMENCLATURE)	
1f iv. Some General Conditions of Electrochemical Decomposition	
Tf v. Volta-electrometer	
IT vi. Primary and Secondary Results	
Ifvii. Definite Nature and Extent of Electro-chemical Forces	
§ 7. ABSOLUTE QUANTITY OF ELECTRICITY IN THE MATTER OF MATTER	U'i.s
VI. § 8. ELECTRICITY OF THE VOLTAIC PILE	
If i. Simple Voltaic Circles	
1f ii. Electrolytic Intensity	
If iii. Associated Voltaic Circles; or HjiUwy	
If iv. Resistance of an Electrolyte to Decomposition	
If v. General Remarks on the Active Battery
